

A promotional banner for CoursePack Creator. It features a man in a dark suit and tie holding a tablet. The tablet displays a futuristic digital interface with a globe, network lines, and various data charts. The text 'CoursePack Creator' is prominently displayed in white, with 'Powered by The Case Centre' underneath. Below this, it says 'Create on-line collections of course-specific learning materials and share for easy access by your students'.

CoursePack Creator

Create on-line collections of course-specific learning materials and share for easy access by your students

Welcome to CoursePack Creator – our powerful and flexible tool to help you quickly create professional and comprehensive CoursePacks.

CoursePacks are on-line collections of course-specific learning materials that offer a convenient one-stop study solution for your students.

Versatile and user-friendly

There is no limit to the number of CoursePacks you can create, or the amount of materials you can include in each one. Just follow these simple steps:

- Upload your school logo to customise your CoursePack (optional)
- Select your teaching materials from our extensive, world-leading collection of cases, management articles, and book chapters
- Get fast copyright clearance for materials outside our collection
- Add any of your own teaching materials you wish to include
- Activate the CoursePack and share it with your students.

You can also use categories to organise your materials, add notes or instructions, track and monitor student downloads, and duplicate your CoursePack for repeat purchase.

Payment options

StudentPay is available to all our customers and means that students pay for each item they download from the CoursePack (excluding free materials). It's great value for them, as they benefit from the reduced educator rate.*

SchoolPay is available to The Case Centre's member organisations. Your organisation will pay for all your CoursePack materials once enrolment is confirmed. You'll benefit from your usual reduced educator rate* and your students simply download everything they need.
